Foam Comfort padding

Cradle net for optimal comfort

FISF [Helmet for Fire-fighters]

Approved according to the new EN443 :2008, the FISF helmets sets the new standard for fire-fighter's head protection and comfort. Dedicated to structural fire-fighting, in buildings, tunnels and other structures, it fulfills the growing requirements of fire soldiers in all urban and industrial operations. Thanks to its unmatched comfort, its adjustable mask attachment feature and its interfaces for accessories, it is a true platform for all critical operations when the helmet must not be a burden for the wearer. With the reinforced shock absorption system and its new face shield, it keeps its unique style and remains the reference fire-fighting helmet throughout the world.

Technical specifications

Application

Structural fire-fighting in buildings and other structures, protection against fire, heat, falling objects, fumes, projections of chemical products and molten metals, etc.

Performances

- CE marking according to PPE directive 89/686
- Tested according to EN443:2008, type B
- Optional requirements (depending on model)
 - Very low Temperatures (-30°C)
 - Chemical products (C)
 - Extended protection area (3b)
 - Surface electrical insulation (E3)
- Faceshield according to EN14458 :2004
 - Optical class 2 for use in long lasting operations
